## **Environmental radioactivity, an event organized by ARPA Lazio on 21 January. ISIN also among the participants**

An informative webinar organized by ARPA Lazio and dedicated to monitoring environmental radiation on the regional territory will be held on 21 January.

The event, which will last approximately 4 hours, after the classic "institutional greetings", includes technical interventions by qualified experts representing ARPA Lazio, the Ministry of Health, ISS and ISIN. In the presentations of the speakers the theme of environmental radioactivity monitoring in Lazio will be addressed, with specific focus on Radon and radioactivity in water.

ISIN experts will address various aspects related to environmental radioactivity, including the critical issues related to indoor Radon exposure, the monitoring of the RESORAD network and the data flows present on the SINRAD database.

To register for the event and for more
