Transport of radioactive materials, TraDaWeb service suspended. Information only on the ISIN STRIMS website.

From 20 January STRIMS (Material and Source Waste Traceability System) is fully operational. All carriers authorized to transport radioactive materials must register and communicate the information, according to the deadlines established in Legislative Decree 101/2020, through the portal: <https://strims.isinucleare.it> [1].

The system for summarizing quarterly data on the transport of radioactive materials (pursuant to Art. 21 of Legislative Decree 230/1995) is no longer in force and therefore the TraDaWeb service, used until the end of last April, has been suspended. Furthermore, in a few days, TraDaWeb will no longer be accessible.

A copy of the receipts and data presented in the years in which the system was operational can be requested at the address trasporti@isinucleare.it [2].
