Radiation protection, the challenges of Research and Society in an ICRP conference

The International Commission for Radiological Protection (ICRP) has organized a conference entitled "Challenges of Radiological Protection in Research and Society" in Rome on 13 and 14 September. The ISIN, in addition to sponsoring the event, is part of the organizing committee and participates with reports and interventions.

The two days represent a precious opportunity for a discussion on scientific and regulatory developments and results in the field of radiation protection and on the challenges expected for the future.

The program of the event, [here](#) [1].
